In un mondo dove la ricerca di novità è il trampolino di lancio per proiettarsi in un futuro "perfetto", ecco che il desiderio di spingersi oltre a ciò che la mente umana immagina diventa un'impostazione per il progresso tecnologico.

GLASS DESIGN nasce proprio dalla volontà di concretizzare tutto ciò che potrebbe essere considerato un'utopia nell'innovazione e nel design.

GLASS DESIGN, utilizzando materiali tecnologicamente molto avanzati, contribuisce alla creazione di tutto ciò che prima non si conosceva, dando vita ad un nuovo stile di produzione. Ogni prodotto viene così creato con il materiale più adeguato per esprimere nuove sensazioni, colori, emozioni.

In a world where the search for innovation is the springboard to cast a perfect future, with the desire to push oneself beyond the bounds of human imagination, innovation is formulated of technological progress.

***GLASS DESIGN** is born from the will to realize the utmost in innovation and design.*

***GLASS DESIGN's** use of technologically advanced materials contributes to giving life to a new style of products.*

Every product expresses new feelings, colors and emotions, created from materials adapted to enhance the inherent characteristics and soul of the product.
