

Il Problema *The Problem*

Profili per jolly

I profili per Jolly Arcansas sono progettati e prodotti seguendo le esigenze e le tendenze del mercato in continua evoluzione . . .

Le loro formidabili caratteristiche di durata e affidabilità, li rendono particolarmente indicati per proteggere tutti gli spigoli esterni, che in ceramica sono particolarmente delicati.

Rapidità e semplicità di posa sono il loro pregio.

Round edge trims

Arcansas round edge trims are designed and manufactured in accordance with market requirements and trends that are constantly evolving.

Their extraordinary durability and reliability make them particularly suitable for the protection of internal and external corners that are particularly delicate, such as those made of tiles. A further advantage is the speed and ease of application.

Baguettes d'angle

Les baguettes d'angles Arcansas sont projetés et produits en suivant les exigences d'un marché qui évolue continuellement ... Leurs caractéristiques exceptionnelles de durée et fiabilité rendent ces profilés particulièrement aptes à protéger toutes les arêtes extérieures, les arêtes en céramique étant particulièrement délicates. Leur mérite est représenté de la rapidité et simplicité de pose.

Viertelkreis Abschlussprofile

Die ARCANSAS Viertelkreis-Abschlussprofile entsprechen jeweils den Anforderungen und der Entwicklung des Marktes. Durch ihre ausserordentliche Haltbarkeit eignen sich zum Schutz der hochempfindlichen Keramikanten sowohl bei Aussenanwendung und sind einfach und rasch zu verlegen.

Guardacantos para azulejos

Los perfiles guardacantos para azulejos Arcansas están proyectados y elaborados siguiendo las exigencias y las tendencias de un mercado en continua evolución. Sus formidables características de duración y fiabilidad los hacen particularmente indicados para proteger todos los cantos internos, que, cuando son de cerámica, son particularmente delicados. Rapidez y facilidad de colocación son sus características más apreciadas.

La Soluzione *The Solution*

PVC PORCELLANATO

Speciale e pregiata composizione plastica atta ad ottenere un aspetto lucido brillante a tutto corpo tanto da sembrare porcellanato. Non teme raggi UVA, graffi, detergenti, ecc. Può essere impiegato anche in esterno.

PORCELLANIZED PVC

Special and valuable plastic compound suitable for the obtainment of an overall glossy, bright aspect that looks like porcellanized. Stands UVA rays, scratches, detergents, etc. Also for outdoor use.

PVC EMAILLÉ

Composition plastique spéciale et précieuse indiquée pour obtenir un aspect luisant, brillant si complet qu'il semble émaillé. Ne craint ni rayons UVA, ni égratignures, ni détergents, etc. Peut être utilisé aussi à l'extérieur.

PVC APORCELANADO

PVC aporcelanado: especial y noble composición plástica idónea para obtener un aspecto lustroso-brillante a todo cuerpo tanto que parece aporcelanado. No teme rayos UVA, rayas, detergentes, etc. Se puede emplear también en el exterior porque perfectamente estable.

EMAILIERTES PVC

Erliesene und wertvolle Plastikverbindung, geeignet für ein Aussehen, dass so glänzend und blank ist, dass sie emailierte scheint. UVA Strahlen-, Ritzen - und Reinigungsmittelfest, usw. Man kann sie auch ausserhalb gebrauchen.

Paraspigoli

Il Problema *The Problem*

Paraspigoli

I Paraspigoli Arcansas sono progettati e prodotti per proteggere gli spigoli verticali od orizzontali prima o dopo la posa del rivestimento. La rapidità e semplicità di posa è garantita dallo speciale adesivo già presente in alcune versioni.

Protective edgings

Arcansas protective edging are designed and manufactured to protect vertical or horizontal corners before or after the covering is laid. Rapid and easy application is guaranteed by the special adhesive applied to some versions.

Cornières de finition

Les cornières de finition Arcansas sont projetés et produits pour protéger les arêtes verticales et horizontales avant et après le posage du plancher. La rapidité et la simplicité de pose sont assurées par le collant spécial qui est déjà présent dans quelques variantes.

Rundkantenabschuss-profile

Die ARCANSAS Rundkantenabschussprofile dienen zum Schutz senk- oder waagrechter Kanten und können vor oder nach der Verkleidung verlegt werden. Der in einigen Ausführungen bereits angebrachte Spezialkleber gewährleistet eine einfache und rasche Verlegung.

Guardacantos

Los Guardacantos Arcansas están proyectados y elaborados para proteger los cantos verticales u horizontales antes o después de la colocación del revestimiento. La rapidez y la facilidad de colocación están garantizadas por el especial adhesivo, ya presente en algunas versiones.

Profili di raccordo igienico

Il Problema The Problem

Raccordi sguscia igienici

I profili di Raccordo sguscia Arcansas sono progettati per risolvere ogni esigenza di raccordo igienico (raggiato) tra pavimento e parete secondo le norme Europee. Le immagini mostrano la semplicità di posa.

Hygienic Cove profiles

The Arcansas cove profiles are designed for use in all applications requiring hygienic (radial) joints between floors and walls in accordance with European standards. The pictures show how easy it is to apply them.

Plinthes a gorge Hygiéniques

Les plinthes a gorge Arcansas sont projetées pour résoudre n'importe quelle exigence de raccordement hygiénique (rayonné) entre plancher et paroi selon les normes européennes. Les images montrent la simplicité de pose.

Hygienischen Eckfugen-abdeckprofile

Die ARCANAS Eckfugen-Abdeckenprofile sind zur Abdeckung aller zwischen Fussböden und Wänden entstehenden Fugen geeignet und werden nach den geltenden EU - Vorschriften erzeugt. Die Abbildungen zeigen die einfache Verlegungsmethode.

Die Bilder beweisen, daß das Legen sehr einfach ist.

Perfiles escocia Higiénicos

Los perfiles escocia Arcansas están proyectados para resolver cualquier exigencia de unión radial entre suelo y pared, de conformidad con las normas Europeas. Las imágenes muestran lo fácil que resulta la colocación.

Giunti di delimitazione

Il Problema
The Problem

Giunti di delimitazione

I giunti di delimitazione Arcansas sono progettati per bordare il rivestimento o pavimento rinforzando il passaggio tra differenti materiali in modo elegante e funzionale.

Square edge trims

Arcansas square edge trims are designed to delineate the covering or flooring and strengthen the passage from one material to another in an aesthetically pleasing manner.

Profils d'angle droits

Les profils d'angle droit Arcansas sont projetés pour border le revêtement ou le plancher en renforçant le passage entre les différents matériaux d'une façon esthétiquement parfaite.

Abschlussprofile

Wo Bodenbeläge oder Verkleidungen aus Fliesen enden, gewährleisten die dekorativen ARCANSAS Abschlussprofile ein haltbaren und optisch einwandfreien Abschluss.

Juntas de delimitación

Las juntas de delimitación Arcansas están proyectadas para rebordear el revestimiento o el suelo, reforzando la unión entre materiales diferentes de manera estéticamente intachable.

Il Problema *The Problem*

La Soluzione *The Solution*

Perché utilizzare i giunti di dilatazione Arcansas?

Principali cause che provocano il distacco della piastrella in mancanza di giunto di dilatazione:

- per il diverso comportamento dilatometrico tra superficie piastrella sottoposta ad irraggiamento solare, e malta di allettamento
- per il ritiro che il cemento presenta nel corso del processo di maturazione
- per assestamento delle strutture portanti.

PRECAUZIONI DA PRENDERE :
Creare giunti di dilatazione almeno ogni 15m² di superficie piastrellata.

Why use Arcansas expansion joints?

The main reasons for the detachment of tiles when expansion joints are missing:

- different dilatometric behaviour between tile surfaces subjected to solar irradiation, and the fixing mortar
- concrete shrinkage during cure
- settling of load-bearing structures.

PREVENTIVE MEASURES:
Use expansion joints at least every 15 m² of tiled surface.

Pourquoi utiliser les joints de dilataction Arcansas?

Causes principales de décollement du carreau en l'absence du joint de dilataction:

- dilatation différente entre la surface du carreau chauffé par le soleil et la couche de mortier
- retrait du béton au cours du processus de maturation
- liaison des armatures.

PRECAUTIONS A PRENDRE:
Prévoir des joints de compression au moins tous les 15 m² de surface carrelée.

Warum empfehlen sich die Arcansas dehnungsfugenprofile?

Hauptursachen für das Ablösen ohne Dehnungsfugen montierter Fliesen:

- Unterschiedliche Dehnung der der Sonnenbestrahlung aus-gesetzten Flieseoberfläche und des darunter liegenden Mörtels;
- Setzung des Betons;
- Setzung des Tragwerks;

GEGENMASSENNAHNE:
eine Dehnungsfugen je 15m² Fliesenfläche

Por que utilizar las juntas de dilatación Arcansas?

Principales causas que provocan el desprendimiento de la baldosa cuando falta la junta de dilatación:

- el diferente comportamiento dilatométrico entre la superficie de la baldosa, sometida a irradiación solar, y el mortero;
- la contracción que el mortero presenta en el curso del proceso de maduración;
- el asentamiento de las estructuras portantes.

PRECAUCIONES QUE ADOPTAR:
Crear juntas de dilatación al menos cada 15 m² de superficie revestida con baldosas.

Coprigiunti

Coprigiunti

I Coprigiunti Arcansas sono progettati e prodotti per coprire il passaggio tra pavimenti di differenti ambienti anche se di uguale colore, dopo la posa degli stessi. Si possono così eliminare difetti di posa, creare giunti di dilatazione non previsti, raccordare lievi dislivelli, ecc... La semplicità e rapidità di posa sono garantite dalle versioni autoadesive

Covers strips

Arcansas Cover Strips are designed and manufactured to provide a natural interface between flooring in different rooms. Even if flooring is of the same colour, after flooring has been laid. Cover Strip eliminates laying defects, create new expansion joints, connects different floor levels, etc... The self-adhesive version guarantees speedy and easy application.

Couvre-joints

Les Couvre-joints Arcansas sont projetés et produits pour couvrir le passage entre les planchers de pièces différentes, même s'ils présentent la même couleur, après le pose de ces planchers.

De cette façon on peut éliminer les défauts de pose, créer des joints de dilatation non prévus, raccorder des légers ressauts, etc. ...

La rapidité et la simplicité de pose sont assurées par les variantes auto-adhésives.

Übergangprofil

Die Arcansas sind als Abdeckung des Übergangs von Fußböden verschiedener Räume nach deren Verlegung gedacht. Dabei können z.B. eventuell bei der Verlegung entstandene Mängel wie kleine Höhenunterscheide ausgeglichen oder ursprünglich nicht voegesehene Dehnungsfugen geschaffen werden. Die selbstklebende Ausführung der Profile gewährleistet eine einfache und rasche Verlegung.

Tapajuntas

Los Tapajuntas Arcansas están proyectados y elaborados para cubrir la unión entre suelos de diferentes locales, incluso de igual color, después de su colocación. Se pueden, así, eliminar defectos de colocación, crear juntas de dilatación no previstas, unir desniveles suaves, etc.

La facilidad y la rapidez de colocación están garantizadas por las versiones autoadhesivas.

Terminali

Il Problema The Problem

Le Soluzioni The Solutions

Terminali

I terminali Arcansas sono progettati per eliminare qualsiasi dislivello creato dalla posa di un pavimento nuovo, sopra uno vecchio, rifinendo e proteggendo così i bordi di uscita.

Le versioni autoadesive possono essere impiegate a posa pavimento ultimata.

Sloped cover strips

Arcansas sloped cover strips are designed to eliminate almost any differences in floor levels which arise when laying a new floor on top of a previous one. Cover Strips finish off and protect external edges. The self-adhesive versions can be applied after the flooring has been laid.

Profils de raccordement

Les profils de raccordement Arcansas sont projetés pour éliminer n'importe quel défaut provoqué par le posage d'un nouveau plancher au dessus d'un vieux plancher, en complétant et protégeant de cette façon les bords de sortie. Les variantes auto-adhésives peuvent être utilisées après le posage du plancher.

Anpassungsprofile

Die ARCANSAS Anpassungsprofile dienen zur Beseitigung der Höhenunterschiede, die bei der Verlegung eines Fussbodens auf einen anderen entstehen, sowie zum Schutz der Endkanten.

Die selbstklebenden Profile können nach der Verlegung angebracht werden.

Terminales

Los terminales Arcansas están proyectados para eliminar cualquier desnivel creado por la colocación de un suelo nuevo encima de uno viejo, acabando y protegiendo, así, los bordes de salida. Las versiones autoadhesivas se pueden utilizar una vez colocado el suelo.

Paragradini

Paragradini

I paragradini Arcansas sono progettati per proteggere i delicati bordi degli scalini soggetti a forte usura, rendendoli contemporaneamente sicuri in quanto antiscivolo.

Subito pronti all'uso nelle svariate versioni autoadesive.

Stair edging

Arcansas Stair Edging is designed to protect the delicate corners subject to heavy wear, making them safe and slip-proof. Ready for use in the many self-adhesive versions.

Nez de marche

Les nez de marches Arcansas sont projetés pour protéger les bords délicats des marches exposés à une usure remarquable, en les rendant sûrs en même temps, c'est-à-dire antidérapants. Ils sont prêts à l'usage immédiat dans les différentes variantes auto-adhésives.

Treppenkantenschutz-profile

Diese Arcansas Treppenkantenschutz-profile eignen sich zum Schutz von starker Abnutzung ausgesetzten treppenkanten und sind gleichzeitig rutschhemmend. In mehreren selbstklebenden Ausführungen jederzeit gebrauchsfertig.

Guardaescalones

Los guardaescalones Arcansas están proyectados para proteger los delicados bordes de los escalones – sometidos a fuerte desgaste – haciéndolos, al mismo tiempo, seguros al ser antideslizantes. De inmediata utilización en las distintas versiones autoadhesivas.
